# Bridges over E40 - Merelbeke

## Project Details

**Activities**
Civil Engineering
Bridges
Road construction

**Contractors**
Willemen Bouw
Willemen Infra

**location**
Oude Gaversesteenweg
9820 Merelbeke Belgium
Oost-Vlaanderen BE
Merelbeke Belgium
Oost-Vlaanderen BE

**Client**
Agentschap Wegen en Verkeer Oost-Vlaanderen

**Temporary partnership**
Aswebo, Franki Construct

**Engineering Office**
Arcadis

**Span**
13m

**Construction period**
1 year 7 months

**Start work**
04-2017

**End of work**
11-2018

In Merelbeke, two bridges on the E40 were renewed and widened, and adapted to much heavier (exceptional) traffic: the bridge over the Tijarm (a tributary of the Scheldt) and the bridge over the Oude Gaversesteenweg. A temporary bridge ensured that traffic on the E40 remained possible in both directions during the works.

Space was made for two emergency lanes and left room for a fourth lane, should it be desired in the future. Four-metre-high noise barriers were provided along both sides of the E40. The bridge over the Tijarm was made longer, allowing a parallel road to fit under the bridge to connect business park Eiland Zwijnaarde with the surrounding roads.

### Willemen Bouw

Boerenkrijgstraat 133
2800 Mechelen, Antwerpen
(Belgium)

Willemen Infra is a leading, Belgian road construction company with a regional presence in both Flanders and Wallonia. An important asset is that we have all aspects of the construction process under our own management and thus fully control the execution. Moreover, our team of 1,000 well-trained and experienced employees are willing to work at night and over the weekend to make sure they get everything done in time. In addition, thanks to our own COPRO and CSC-certified production and recycling sites, we are one of the leading producers for asphalt and road concrete.
