Construction period
1 year 6 months

Start work
11-2017

End of work
05-2019

By developing intermodal nodes and kiss-and-ride zones, the Brussels Region aims to offer an alternative to car traffic to the city centre. These are car parks in the immediate vicinity of metro stations or tram lines. Parking Ceria-Coovi is a new four-storey car park that can accommodate 1,300 cars and motorbikes. The roof is also equipped as a car park. On the ground floor there is a secure bicycle shed for 300 bicycles.
