Surface area above ground

50 000m²

Construction period

11 months

Start work

02-2016

End of work

01-2017

On a site of just over 10 hectares along the E313 motorway, we built a $50,000 \, \text{m}^2$ distribution centre with 62 loading docks. From this location, CASA shops have been supplied throughout Europe since 2017. Thanks to a space that can accommodate 65,000 pallets, the company can save 5,000 freight trips a year. In addition to the warehouse and the necessary technical areas, the new building comprises $5,000 \, \text{m}^2$ of offices spread over four floors.
