#### Surface area above ground

18 000m<sup>2</sup>

#### Construction period

2 years 1 month

#### Start work

08-2017

#### End of work

09-2019

This brand new fire station is one of the most important stations in the region. The station has a five-storey office building and a vehicle hall with a full span. This means that there are no propping poles that could impede a rapid response. On top of the hall there is a fitness room and a sports hall. The new building also has sleeping quarters, workshops, an exercise tower and an exercise ground. By the way, the whole building is almost energy neutral.

### Willemen Construct

Boerenkrijgstraat 133
