Tunnel under Gent-Dampoort railway line - Ghent

Project Details

Activities

Civil Engineering Railway infrastructure & stations Tunnels

Contractors

Franki Construct

location

Station Gent-Dampoort 9000 Gent Belgium Oost-Vlaanderen BE

Client

Stad Gent

Engineering Office Sweco

Span 23m

Surface area subterranean

1 200m²

Construction period

1 year 1 month

Start work 03-2018

End of work 04-2019

The construction project involves the construction of a new cycle and pedestrian tunnel under the railway line, a new coach park and work in the surrounding areas at the Gent-Dampoort station. A new tunnel is being built under the track to create a safer cycling connection. The cycle paths are largely being installed using a concrete U-passage. The new tunnel under the track is realised using the box jacking method, with the tunnel going through the railway embankment. The jacked tunnel is 23m long.
