**Surface area above ground**
2 900m²

**Construction period**
1 year 7 months

**Start work**
02-2014

**End of work**
09-2015

Building safely on a school site in use. That was our challenge in building a new primary school for the kRing. With a detailed plan of action explaining our safe way of working on and around the school site, we were able to convince the client to allow us to build this school.

The project consists of the new construction of a complete primary school of about 2,900 m² with outdoor space:

- Green roof with small educational vegetable gardens.
- Complete finishing and all techniques.
- Infrastructure: 2 playgrounds, one of which is covered.
- The green covering of the building also serves as fall protection for the schoolchildren.

Watch the timelapse video.

### Willemen Construct

Boerenkrijgstraat 133
